& HFD MIRROR (No: 1)

E. Harris

Dear Readers,

We began THIS issue with every good intention of making it one of the best in UFO material this side of 1970, but owing to the fact that we are removing to a new address plus other events, have left me VERY little time in which the promise I made to a FULL colour SUPER SPACE-DRIVE for issue number 5 will have to be left for the NEXT ISSUE no: 6. But we have made this pre xmas issue interesting as possible.

Material intended for this issue will now be seen in the next issue.

We begin this special issue of Space-Drive with our newly created UFO MIRROR no:1 which will follow every other issue. Issue number 6 is still all UFO however.

We would like to extend our thanks to all the well known UFO authors of UFO material for sending in material for publishing. These were Brinsely Le Poer Trench, Arthur Shuttlewood, Gene Duplantier, Gray Barker, and that man who sees ROCK pictures., Richard Shaver. Their photos and articles in colour next issue.

UFO MIRROR is now a Copy right name. Material may be taken from Space-Drive providing the source is acknowledged and our address published.

Please note that after December 1970 please address all matters intended for me to: 30, Hockerill Street, Bishop's Stortford, Hertfordshire, England. However please continue to use the address below as we will still be here for some time.

TO ALL CORRESPONDENTS

Will all correspondents please note that while removals are being effected from here and while the next issue is being arranged will they please write to our reporter Miss Janet Busell, who is acting as temporary secretary during this period until further notice to:

SPACE-DRIVE magazine c/o miss Janet Busell, 75, Parkside Estate, Rutland Road, Hackney, London, England. Thank You.

As you may have noticed, Space-Drive is no longer FREE. The fall of in lack of support by advertisements, donations, etc, has led to this unwelcomed measure.

The new incorporated title was conceived from an idea gained from a letter from GRAY BARKER editor of Saucer News, who said that his magazine RELECTS all that's going on in UFOLOGY..hence a MIRROR!

Hope to see you all soon in the new year with issue number 6..the super Space-Drive this one should have been. All the best for 1971.

EDWARD HARRIS

SPACE-DRIVE'S TOP TEN OF POPULAR UFO MAGAZINES ON THE SCENE TODAY: (based on readers comments) In brackets-last issues rating. opinions in poll are WORLD WIDE :

1. SPACELINK. (2)
2. FLYING SAUCER REVIEW (1)
3. SAUCER NEWS (3-)
4. SAUCERS SPACE AND SCIENCE (4)
5. BUFORA JOURNAL (o)
6. COS-MOS (7)
7. SPACEFLIGHT (B.I.S.) (5)
8. INTERPLANETARY NEWS (8)
9. UFO NACHRICHTEN. (6)
10. SPACE-DRIVE (9)

SPACE-DRIVE magazine is published and printed by the Experimental Space Craft Development (ESCD) at: 19, Lealand Road, Tottenham, London, England. N.15. 6JS. MATERIAL MAY BE TAKEN FROM THIS ISSUE providing credit is given and the above address is published.

SPACE (G) DRIVE

Space-Drive magazine and UFO MIRROR

OUR POLICY...DO UFOS E IST ?

A MESSAGE TO DR. CONDON

To Doctor Condon from Space-Drive . This issue has been sent to you with our opinion on your team's report. We would be grateful if you would give us one second of your time to read it..even if this is only a mimeographed magazine AT PRESENT!!!

Dear Sir,

We believe, that since your report was published, on the question of unidentified aerial flying objects, is now reverberating around the world causing tidal waves of speculation and controversy even now among those highly respected people researching most of their lives into the same subject. We say to you from a NEUTRAL STANDPOINT, that perhaps it was money well spent, perhaps not, but either way, you and your team have left the world a highly valuable documented record that historians of the future can refer to, whether it be right or wrong.

For whether your team ARE right or wrong in coming to the conclusions they have, our verdict on this enigma is ONLY TIME WILL TELL and we would loathe to see that if your report proves false in the near future, would not perhaps be referred to as the report that; "NEVER WERE SO MANY, MISLED, BY SO FEW", for in this wide and controversial subject, we now have said our piece and would like to remain like many others until material proof is found, just unenlightened observers.

From the Editor. Edward Harris.

PS. I wonder if perhaps that PROOF in material form, that we could see and touch, would prove to you that GOD exists. If it does not, why are we all taught from school that he does, when we can't see him or touch him, yet we have to accept that he DOES EXIST. Would your team like to DISPROVE THAT one way or the other! Perhaps he, like the UFOs DOES EXIST, but we know we can't prove it..can we ?
(A message to all researchers next page)

UFO groups and researchers everywhere, of every status level of their research, whether they be University men and women or inexperienced private researchers-should not give it all up just because the Condons team gave the verdict it did, but go on being HISTORIANS, recording, writing, evaluating, and filing reports on unidentified aerial flying objects. Then if one day we find the hard evidence, scientists and others are all screaming out for, these reports will of course then be of immense value to complete the picture of the jigsaw puzzle. So to all groups everywhere, whether in Australia or Antarctica, if there ever were a group there, to STOP TEARING EACH OTHER UP with issues that are negligible and of no consequence and which are petty by modern standards and iron out your differences and CO-OPERATE. Be friendly and if those UFOs DO exist we should be working together to find out not apart in ideas which will only hamper the seriousness of the issue.

To groups in Australia we say VISIT EACH OTHERS MEETINGS by all means but give an ear to your own group as well, if you don't like your own group then report the reason to your President as to the reasons WHY? Then he will be able to correct the situationn. By this we mean the members of the Australian groups of TUFOB, TUFOIC, TFSOA...

TO THE GROUP KNOWN AS SIUFOP (Society for the Investigation of UFO Phenomena) we say: YOUR NEWSLETTER WE FEEL, IS VERY SMARTLY DOING THE WEEDING IN THIS UFOLOGICAL GARDEN WE MENTIONED IN THE LAST ISSUE, by sleuthing around (OUT OF THOSE ARMCHAIRS IT SEEMS) and giving credit and influence where THAT IS DUE and debunking those issues and people where that is due..keep it up, a very sane approach to the subject.

THE EDITOR

THE STAFF OF SPACE-DRIVE WOULD LIKE TO TAKE THIS OPPORTUNITY
TO WISH OUR READERS AND FRIENDS A VERY MERRY XMAS AND A
BRIGHT AND HAPPY NEW YEAR.

[illegible]

Space-Drive voluntary staff: Edward Harris-Editor. Janet Busell-special correspondent, William Hoffman, Malcolm Jay. Helpers: Jaqui Doctor, Jill Wells, Michael Landau, N. Gilbert, Beryl Wallace.

Exchange Journals received: COS-MOS, SLUFOSG NEWSLETTER, PSYWAR, GEOS INTERNATIONAL, TOPSIDE, PHENOMENES SPATIAUX, PROBE, SAUCERS SPACE AND SCIENCE, 3 ISSUES OF UFO OBSERVER, SOLAR SPACE LETTER, COSMIC CONTACT, SIUFOP NEWSLETTER, UFO NACHRICHTEN. Many thanks to you all for the information (Apologies if I have forgotten to mention some newsletters) BUFORA RESEARCH BULLETIN. NOTE: UFO CHRONICAL HAS NOT APPEARED NOW FOR A LONG TIME, WE FEEL IT HAS CEASED.

22/9/70

Dear Ted,
Thanks for your letter. Did you get
UFO CHRONICLEs NOS 6 and 7.

I have no intention of folding up but less time, growing costs and a fall of in support will probably mean an eventual "merger" with another UFO magazine to keep my particular material available to ufologists. I am feeling well now and the baby is blossoming out, very forward and strong.

Dear Ted, ..About Space-Drive, very good especially the MAROONED pages, you have made the film look so good I think that I'll go and see it when it comes round our way. I hope you keep up the good work.

Sept . BERYL WALLACE

To: _____ CHRONICLE
Dear Mr. Hoffman,
I am a student in the 10th grade I
am interested in UFOs so if you can,
please send as many photographs as
possible for my class. Thank you.

ANDREW ROSENBERG

(Copy of Space-Drive was sent)

Dear Ted,
Thanks for your copy of Space-Drive
I was glad to see your report on
the Spacelink Symposium-also the
photographs! Best Wishes,

31/7/70

Dear Sir, Received from a person in Devonport, Tasmania a copy of your Space-Drive. You have been what we have been looking for in England. An excellent production indeed. You say it is free. Well, we would like it each time of issue if you don't mind. In exchange we will send you our bulletin called "UFO OBSERVER" One is enclosed inside. We are in communication with CONTACT (UK) but consider his magazine useless to us. Yours is just the thing what we want. We have added you to our free mailing list and hope you do likewise.

Regards and best wishes from our group. JEREMY HOLDEN. Tasmanian UFO BUREAU. Australia.

Dear Edward, Thanks for Space-Drive. I've come to the conclusion that there only two things wrong with it-the printing and the price. I realise it is a vicious circle what with needing more money for better printing facilities etc, but seriously though, with a lot of hard work I think it could become an interesting publication. Your method of printing articles by the readers is an excellent one, as the readers virtually are writing their own mag. I myself prefer a wider range, of astronomy, space technology and articles about Apollo moon missions etc, as well as ufological topics.

Sept 20 th

Dear Edward, Thank you for your complimentary copy of Space-Drive I am sorry that there is going to be a long break before the next one but I trust that the lithography work will make the magazine easier to read and better laid out. I am afraid that duplicating machines are only capable of taking line diagrams with print down to a certain minimum size. ... (next page)

SAQUI PROCTOR

6. in contrast the reproduction on page 17 by litho is very much better, an annoying jumble of type faces on the letters page makes reading trying.

I make the above points to assist you in achieving a better magazine in which to carry your good ideas. In this way they will have more weight and will profit you the more. I hope they are taken in the spirit in which they are given.

Yours sincerely with every best wish
for Spacedrive, STEPHEN SMITH(BUFORA)
M.A.

Dear Sir or Madam, It is with great regret that we must tell you that ASTRONOMY TODAY must cease publication
Yours faithfully, PLANET PUBLICATIONS

Dear Mr. Harris, I don't know if you expect Space-Drive reporters to promote the sale of the magazine as well as provide material for it. . . But I should I be approached by anyone wishing to place an order for Space-Drive I would be only too pleased to provide your address or order form.
(from one of our new reporters to be Miss Jill Wells) WALES.

Dear Sirs, We would like to submit our bimonthly publication: "THES EXTRATERRESTRES". In the latter we deal with Unidentified Flying Objects" problems. Our association covers more than one thousand members, radio, T.V. and written press have treated, in France, and in some foreign countries, our researches, and our group is now well known. We would like to exchange of our magazines. We shall send you our "IES EXTRATERRESTRIALS" which will be printed in the not too distant future and hope to receive yours.
FROM GROUPE D'ETUDES DES OBJETS SPATIAUX DE FRANCE.

CEYLON 20/7/ 70

Dear Mr. Harris, Thank you very much for your letter 26th April which I received a few days ago. Your compliments with your SPACE-DRIVE magazine

is warmly welcome. Your friendly hand extended to me accross the sea is greeted at this end with both my hands in sinceraty of purpose. Yes, I did read about that "Lump of Matter" appearing in the "TOPSIDE". I am certainly happy to to be your friend and that to infinity if you wish. As far as material commitments permit me, I shall correspond with you. At present I do not publish anything but in case I do, I shall not forget you. Thank you for the assistance offered.

Meanwhile, I have enjoyed your Space-Drive and I shall pass it around. I am driving in SPACE Inner most. Wishing you GOOD LUCK and BRIGHT SUCCESS and hoping that you will CONTACT many many UFO and identify them and understand them.
Yours very Sincerely,

UPALI AMARAASENA

August 25th 70

Dear Edward,
I did intend spending a night on Stonehenge but this again I am not certain of. Its all very well having these ideas while sat at home in an armchair, but out there alone on a dark night with a strong imagination, it could be very creepy. Why spend a night there? Well I think there is some connection between Stonehenge and UFOs. Also as it's so old this place will have many strange things have happened there over the last few thousand years, and so will be full of occult aura. Have you ever thought why the UFOs visit this part of the country, we always think its some scientific reason but could it not be of a ritualistic nature ? We for instance are an advanced and intelligent people, or so we think, yet we still are full of superstition. Men still visit flanedrs nearly 50 years after the first world war. (Continued on page 10)

GOOD-BYE TO THE UFOs-NEVER!
UFO MUTTERINGS.

page 7

by Malcolm Jay.

eral public now lost interest, but people are still seeing UFOs and these people know that they exist.

It's strange that people who see UFOs have no interest in them until they see one and then bitten by the bug of curiosity want to find out more about them.

These sighters are reluctant to tell of their sightings in case they get laughed at most of the time.

But as the prophet UFOCIOUS says he who laughs last laughs best.

How often do you look into the sky? Think about it! As I write this I am sitting in my cab rank in a busy part of London. That's right I am a London 'cabby'. Pedestrians ambling along heads bent downwards searching for their lost fortunes, knowing nothing of what goes on above them.

You might say WHAT! UFOs OVER LONDON? Yes and in the middle of the day.

The first one I saw was in June 1964, about 11 am. At that time I was not really interested in UFOs as I am now. I was driving west down Kensington High Street and I stopped at the lights at Earls Court Road. I was looking at the small clouds that were beginning to form. From the top of my windscreen there appeared this small

Good-bye to the UFOs, Never! I am still getting sightings and reports of landings.

Since Condon told they don't exist the gen-

round black object the size of a large pin-head at arms length. I thought, a fast flying jet up high but it went under the clouds not over. I saw no wings and it was round, black and fast.

Perhaps it was one of those flying saucer things I thought? It must get picked up at Heathrow's Radar, and I'll read about it in the newspapers. But nothing was seen in any newspaper or on television. SO WHAT DID I SEE?

The sighting lasted 5 or 6 seconds. If you saw a UFO, who would you tell and would they believe you?

A true Ufologist should always carry a camera. Here is an example. The time was 10 pm when my phone rang. It was my friend Ron. He said he was at that very moment watching a UFO. "You're ...WHAT!" I exclaimed. He affirmed that he had been watching it for a quarter of an hour.

Have you taken any pictures I asked him? (Ron has a 16mm Cine camera.) He answered that he did not have any film in the camera. The air turned blue with my curses at him. He continued to observe the UFO for over one hour until it moved off to the east. So here's point one KEEP THE CAMERA LOADED ALWAYS! How fast can you get your camera into action. I can whip mine out of its special box I carry in my cab and can expose the first film in 4 seconds. It pays to be fast, as these pictures of news stories I have had published proves.

Get a camera the best one you can afford. But even an instant would be better than nothing. Set the focus at infinity

or at distance with the shutter speed set at hundred and twenty fifth or at 100 and the lens stopped down to f/5.6 or the middle stop of your lens, as it is most effective at the middle stop.

These figures depend on the film speed. For example 200 ASA on FP3 or FP4. But black and white on FP3 FP4. But black and white film has quite good latitude. (continued in the next issue)

QUOTATIONS, POEMS, AND WHAT THEY ARE ALL SAYING IN UFOLOGY TODAY.....

"Extraterrestrial beings might be incomprehensible to us except as gods; and if the tendrils of their consciousness ever brushed men's minds, it is only the Hand of God we could grasp as an explanation."

Credit: TOPSIDE and Stanley Kubrick.

"Nothing comes by chance, so pray for guidance every day. Then whatever comes, whatever happens on the way, it will fit into the jigsaw puzzle of your destiny, no matter how inconsequential it may first appear to be. Certain people you are meant to meet as you progress though it may not always seem to lead you to happiness. All your roads you have to tread. So remember, if you can, nothing comes by chance. There is a pattern and a plan."

Credit: Topside and Florence Altass, English Authoress, Poet and Philosopher.

"There are no experts in UFOLOGY-only some who have more knowledge and experience of events Ufological than others! That sounds like a quote though if it is, I cannot place the source (unless it be by me)! Nevertheless to my mind it certainly is true, and before we criticise others for pursuing lines of thought and action dissimilar to our own let us first consider whether our approach is not open to criticism also. It is very easy to denigrate others for being non-scientific, too scientific, prone to exaggeration or mis-statement-there are very few (including myself) who at times have not been guilty in this respect, however accurate and dispassionate one may strive to be-and many other faults, real or imaginary. The truth is that the truth may come from any source-quite possibly from numerous sources, and those who indulge in unjustified criticism of UFO researchers, UFO societies, and their members, named or unnamed, should first ensure that their own actions, aims and methods, viewed through others eyes, are above reproach.

NOTE: Underlining is curs. Well done COS-MOS. Credit: Norman Oliver.

The above fits nicely several persons of noted repute who have slammed this magazine in the past. I wonder if they feel also that THEY ARE ABOVE REPROACH? Adding, that they may very well be writers, but let them just try to put a magazine together in their spare time. These persons will remain nameless.

(Continued on next page)

Prophecy "What object this, of weight restraining, of shape and
and concurve spherical; with speed increased, inductance
waning, What force promotes this miracle?"

What distant object does it seek? Mayhap some distant,
shining star, with light so vibrant, yet so weak, transcript
bodies, world's afar!

Within the limits atoms dance, outward striving, vitals drumming
Till stopped by some mauling substance, there to wait a fate
forthcoming. "What," you ask, is here concerned? "What is this"?
of which I speak? Wait and you will see it coming, this is but
a prophecy! Credit: PROBE magazine and John B. Bernadou (Condensed)

J U D G E M E N T (We dedicate this poem to Joe Conway of Tottenham,
London, who has been asking for weeks about it
By Derek C. Samson. since printed in NICAP JOURNAL:)

Oh 'men of Earth, your time is nigh' and judgement day
is coming by.

You have turned your back upon the one up high and
ignored the signs up in the sky.

For a billion years we have observed you mortals, from
disc-shaped craft with golden portals.
And soon you will see our ships descending, for your
wars and greed are never ending,

Oh 'men of Earth, your time is nigh' and Jugement-Day is
coming by.

We have watched the mushroom light the sky, and have
seen your rockets climbing high.

Your leaders announce that we are unknown, and astronomers
claim you are all alone.

But these in their plight shall change the tone, when they
bow before the only thrown.

Oh 'men of Earth, your time is nigh' for Judgement -Day
is coming by. You laugh and scoff, and never try,
to understand those learn and pry.

But in your midst are many that will not falter, and in
their mission will accept no quarter,
For tis plain for all to see, man will never alter,
he now must face his Judgement-Day, with the--
Flying Saucer.

Derek C. Samson. NICAP GB.

(letters continued from page 6)
How many thousands from all over the world visit Stratford-on-Avon, and you can think of many such places yourself visited, not for any down to earth reason such as Blackpool, Las Vegas or any such place which is of interest to us other than for historical reasons. Yet still they come those UFOs. Do they come because of something that happened long ago, or do they come for instruction, is there a computer of some type there which gives or takes information from these enigmatic craft.

A number of people who saw the film 2001 had to ask or discuss what the oblong object and ending of the film was supposed to mean. It would be interesting to hear from readers what they thought it was. We would have some interesting and no doubt many different opinions. FROM BILL HOFFMAN:
22, Belgrave Street, BURNLEY, Lancs, ENGLAND.

(EDITORS NOTE: the long object in the film we feel was supposed to have meant KNOWLEDGE for all who touched it. What the ending implicated is still somewhat vague.)

AUGUST 25th 1970

Dear Mr. Harris,
Yes, we are still continuing with our researches, and at present are mainly concerned with trying to unearth all the sightings; past and present that have occurred in this area. We don't have anything definite to claim re UFOs and try to keep an open mind on the subject, and look into all aspects of the phenomena.

PATRICIA BARNES (SLUFOSG)

3/7/70

Dear Edward,
Thank you for your letter. I would still like to clear up a few differences... SKYWATCHES A complete waste of time and energy..what do you accomplish ?,when you have seen as many UFOs as I have you will be none the wiser..I've told you before, the answer does not lie up in

the sky..but upon the ground. WE MUST UNCOVER THE PAST..TO EXPLAIN THE FUTURE.

SERIOUS You have it all wrong the NICAP JOURNAL is serious but about allied subjects which hold the key to the past, there is more to it than just a disc in the night sky.

SCIENTIFIC. Our Journal is scientific but utilising the science of geology..pre-history..archaeology..astronomy

ANSWERING LETTERS. I have answered all of your letters..but I am finding out that quite an amount of my correspondence is going astray. JUST STARTED UP My dear Edward..I first saw my first UFO when I was 14 years of age..I am now 24 since then I have been investigating UFOs for just over 28 years even before Kenneth Arnolds sighting, my organisation is the oldest in existence, I have a room filled up with data books etc,

Please do not worry.. I have been used many times by others that I put my trust in..I am a great believer in truth TRUTH is a great weapon.

FAKERS I do not publish LIES..FICTION..or UNTRUE STATEMENTS..everything in the journal is true and substantiated by ancient records which many people will ignore for many reasons.

While we are near the subject..so called cranks..crackpots..in UFOlogy are going to have the last laugh the most extreme in our research will turn out to be the truth. Others like SLUFOSG will bury their heads in the sands..crying all the time SCIENCE..SCIENCE..and you know what SCIENCE WILL KILL THEM.

OCCULT Why is it that people like you push aside what you call occultism, these are powers, that can be used, the powers of nature, ..solve nature and you will have your saucer propulsion..its not magnetic or electric simply AIR-SOUND and VIBRATION solve this and you have your propulsion, Well Edward, now that we have cleared up a few more items..let's stop letter wagging and get down to Work...DEREK SAMSON (NICAP GB)

WORLD WIDE IMPORTANT UFO SIGHTINGS

This new UFO MIRROR section of Space-Drive is an EMERGENCY issue and not as advertised (see editorial) In every UFO MIRROR you will see only the really important UFO sightings:

BRITAIN: An orange glowing ball was seen in sky (see letter page) Saturday 21st November. More details to be seen is in no:6

AUSTRALIA: Five fishermen saw a flying saucer-shaped like an orange off the East coast of Tasmania. The fishermen say they had a clear view of the saucer hovering at 150 ft for more than two hours on a Tuesday morning. The sighting was made from TWO scallop boats anchored off Paddy Island-two miles from the coast. Two lights like burners shone from the underside of the object. It then rose to 400 ft and disappeared.

NORWAY August 1970 Witness saw two white lights following close behind each other. They were 50 to 60 degrees east and travelling very fast.

NEW ZEALAND 1/2/70 Mr. Morris of
Clyde Central Otago stated he saw
elongated object travelling at
high speed due west towards Orion

(Credit to the above) australian sightings UFO OBSERVER.

BRITAIN 14th November 1970.

Mr. David Pix of Walthamstow saw on his way home what he describes as a long silvery vapour trail very high in the sky rapidly travelling left to right towards the constellation of ORION. Time about 1.30 am and PITCH BLACK sky.

Editors assesment: This could have been a very high flying aircraft that at that altitude picked up the suns rays from the other side of the earth. Perhaps even a bit of space debris returning and burning.

NOTE ON UFOS IN GENERAL:

Space-Drive discussed in its next issue some of the interesting conclusions reached on the UFOs by John A. Keel. In the next issue, we feel it is important enough to print, for it may be the whole ANSWER to the UFO enigma and gives the Condon report extra strength to add to its conclusions..where do they come from??? You will be suprized at the revealing answer in issue number 5 of this magazine. SEND FOR SPACE-DRIVE NOW! 2/6 each copy or 12½pence (new pence) in full colour. Postage extra 4d or 5d.- 1½-2pence.

THE NEXT ISSUE FEATURES ARTICLES
WE HOPE BY ARTHUR SHUTTLEWOOD,
BRINSELY LE POER TRENCH (CONTACT
